We consider the need for sustainable technologies to be a key focus for Honeywell. Our Sustainable Technology Solutions (STS) business includes renewable fuel technologies; low global-warming-potential refrigerants, solvents, blowing agents, and propellants; energy storage; and plastic recycling. Our Sustainable Building Technologies (SBT) business was established to advance technologies and services that drive carbon neutrality through carbon reduction, emphasize indoor air quality and occupant health, manage different sources of power, energy storage and usage, and help companies and communities meet their sustainability commitments. We see these technologies as differentiators for Honeywell and will continue to look at these as well as other opportunities as part of our planning.
